Kriti Chaudhary

Hello

interactions

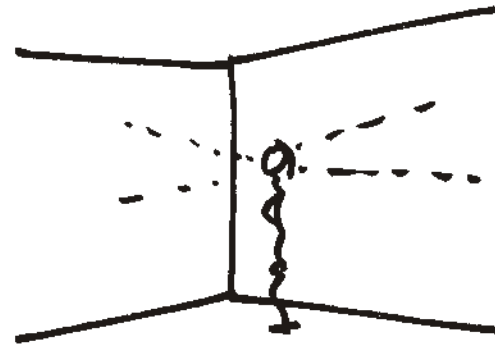

Convent Of Jesus & Mary (1991-2004)

Apeejay Institute Of Design (2004-2008)

Interior & Furniture Design

Srishti School Of Art, Design & Technology (2008-2009)

Product & Interface Design

interactions

Internship at Karigars, New Delhi
Interior Design I Graphic Design

Internship at Upasna Design Studio, Auroville
Sustainable product design I Upcycled design

Version Absolute Design Studio
Experience Design I Information architecture

Ambar Agnihotri Ceramic Studio
Wheel Throwing I Clay Handbuilding

Bus Shelter Design

Thesis project at Apeejay Institute Of Design

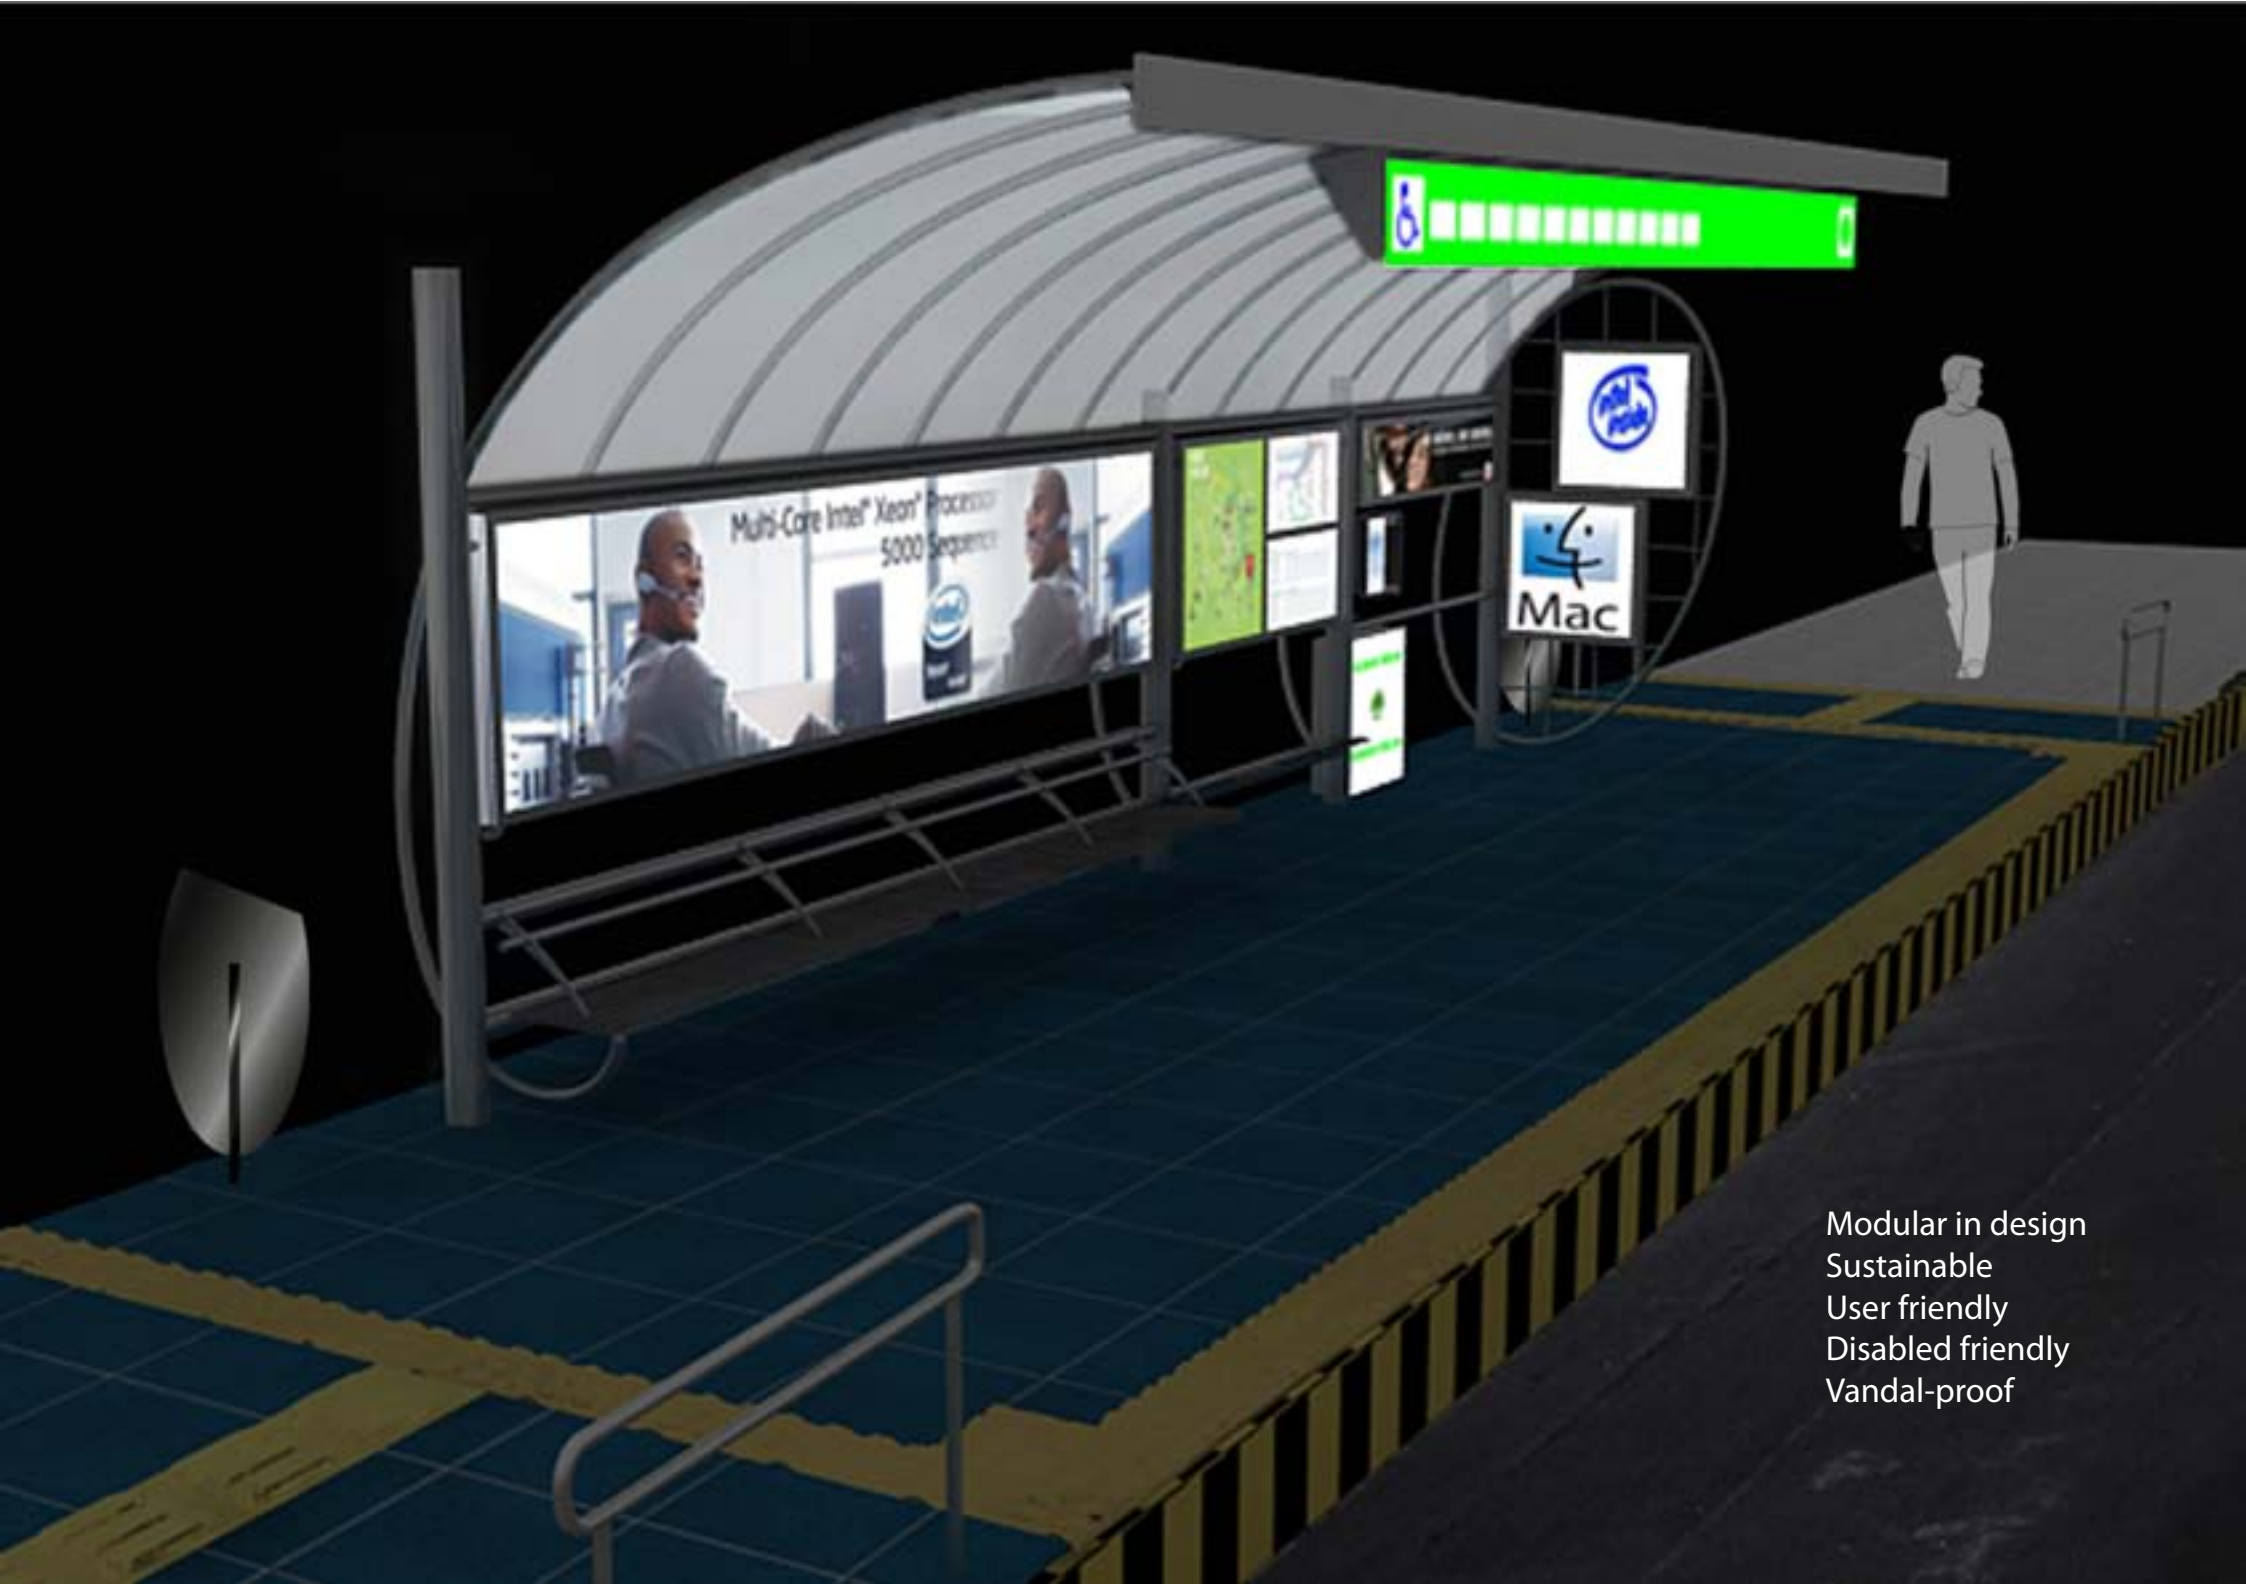

The elliptical form of the proposed bus shelter design works to break the static look found in existing bus shelters and the slight inclination of the elliptical frame towards the road gives it an overall sense of motion.

The form of the bus shelter gives it the potential to stand out as a landmark, while not being an exclamation point in the city, it can still be the perfect comma or colon, thus giving it a character of its own.

It provides a protective space from the elements and establishes seating and standing areas within the shelter.

Modular in design
Sustainable
User friendly
Disabled friendly
Vandal-proof

Concept for coffee table

Project at Apeejay Institute Of Design

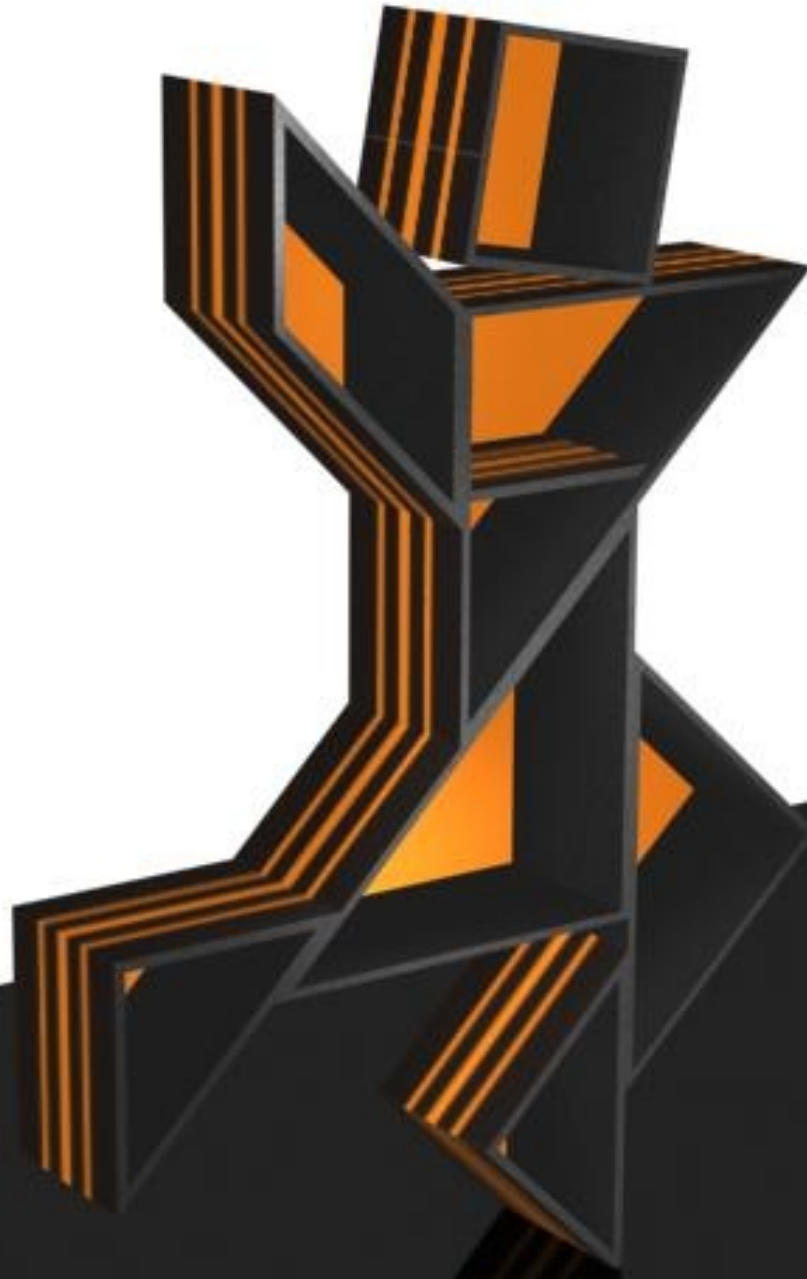

Adaptating saddle notch joinery
In different configurations for a coffee table

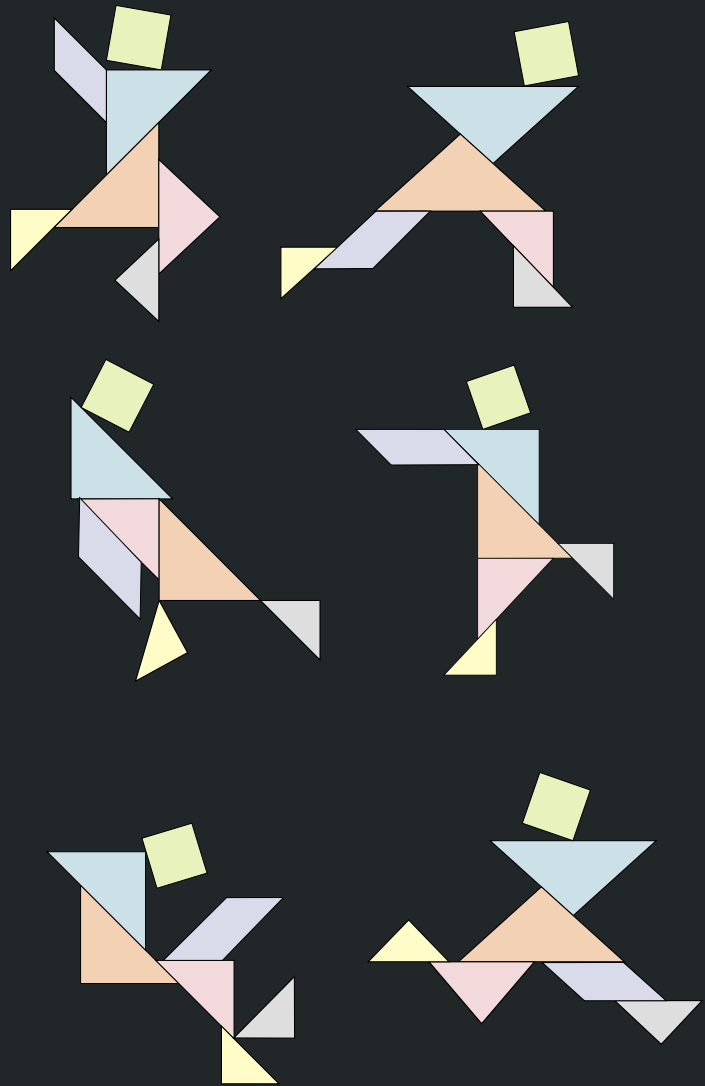

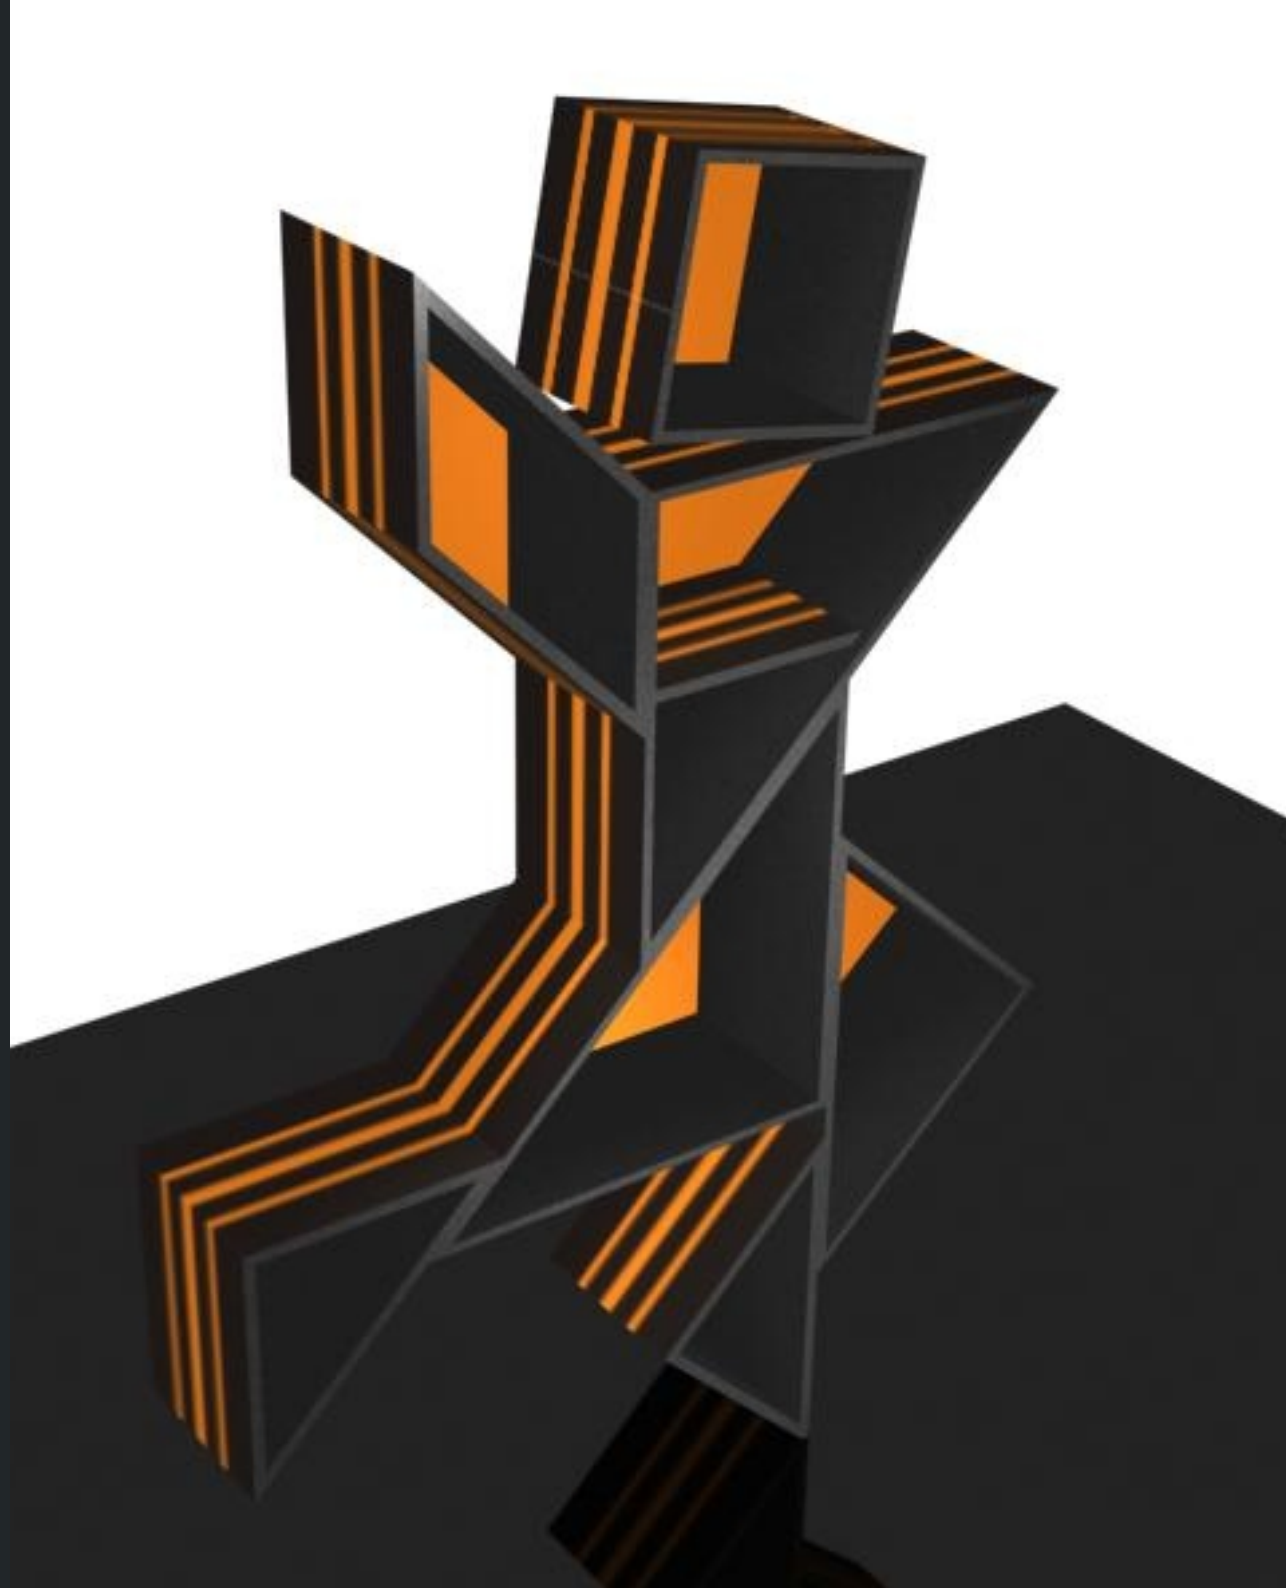

Shelving Design

Project at Apeejay Institute Of Design

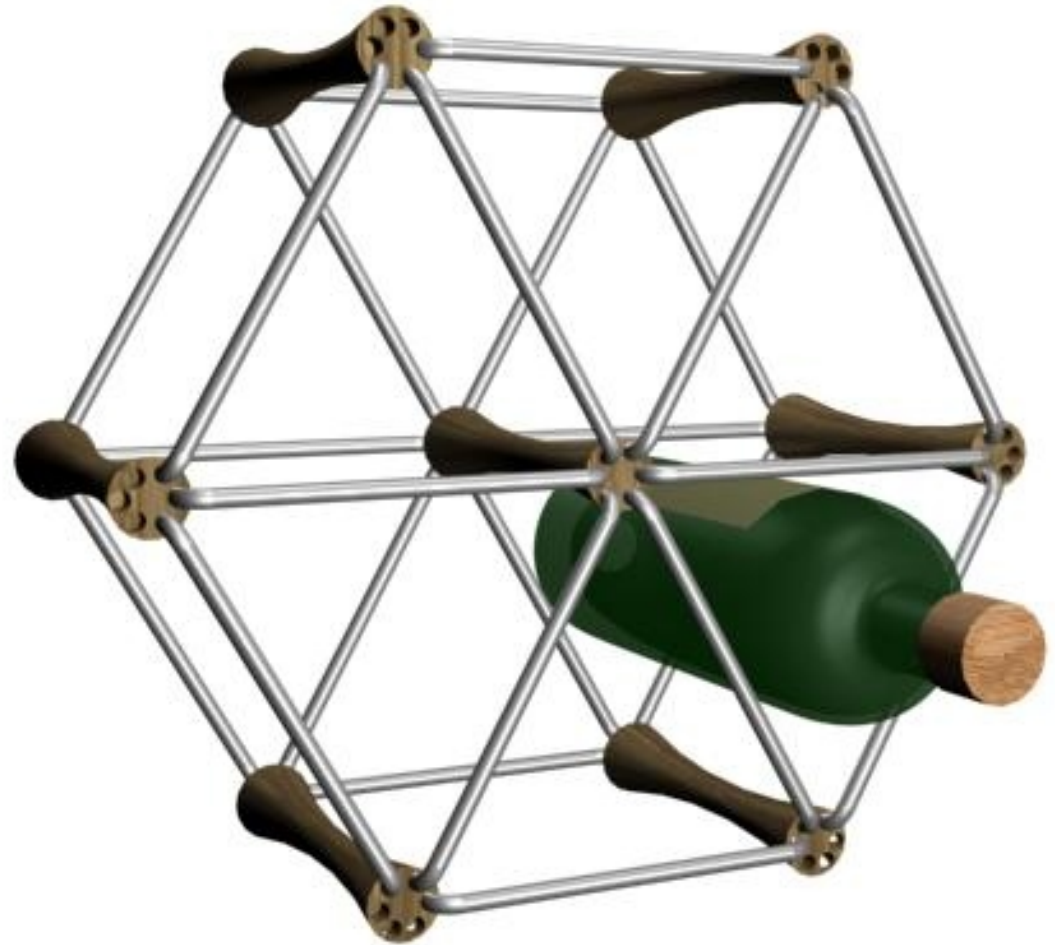

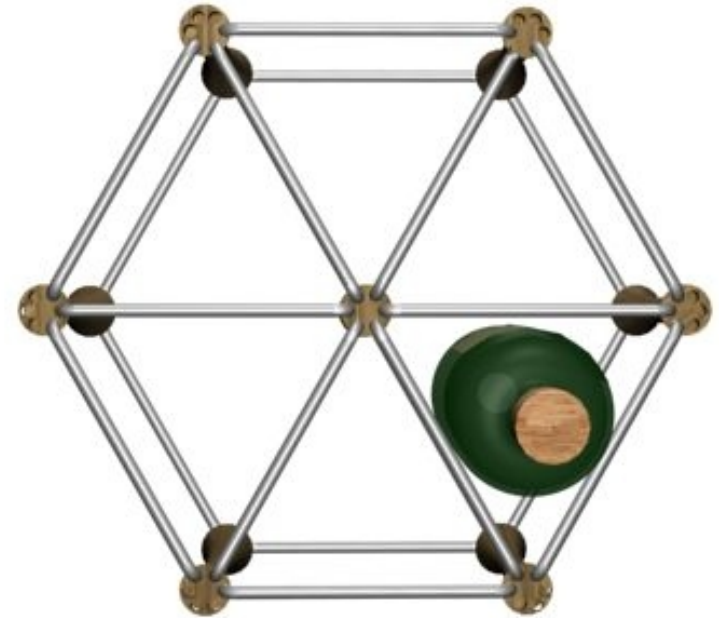

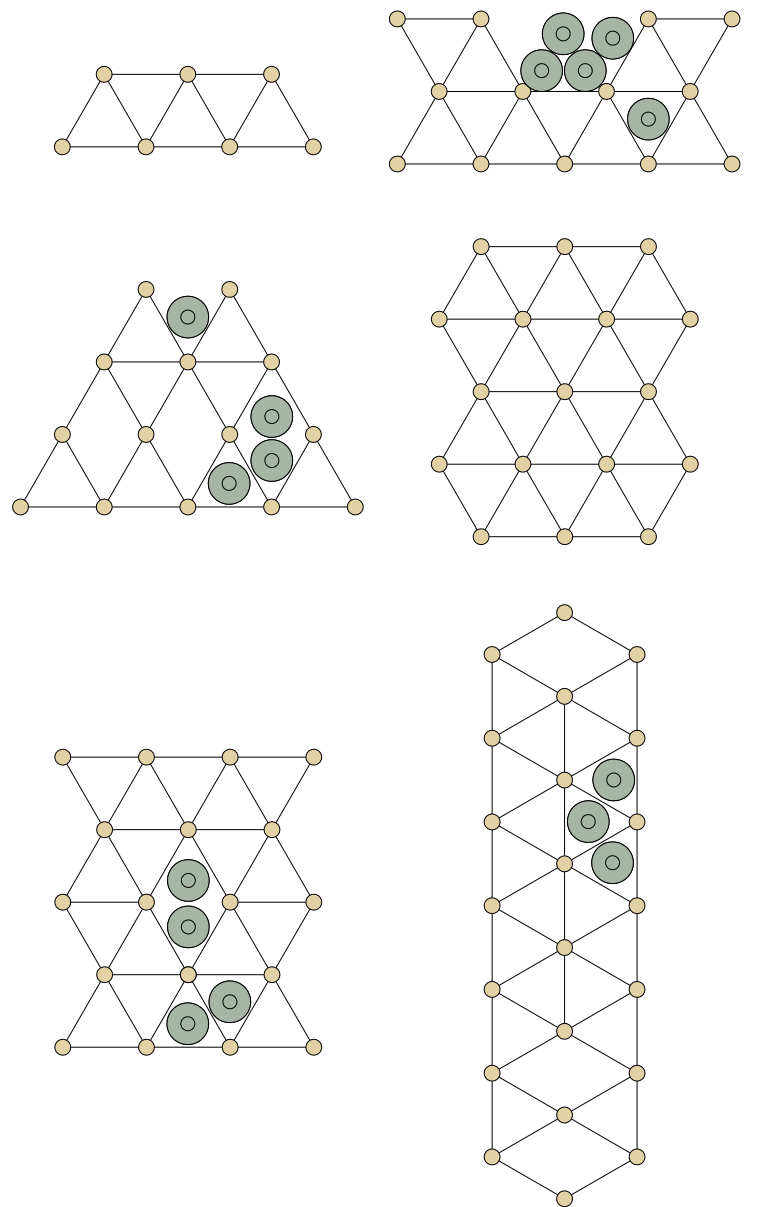

Display system for sports shoes & accessories
Inspired by Chinese Tangram

Wine Rack Design

Project at Apeejay Institute Of Design

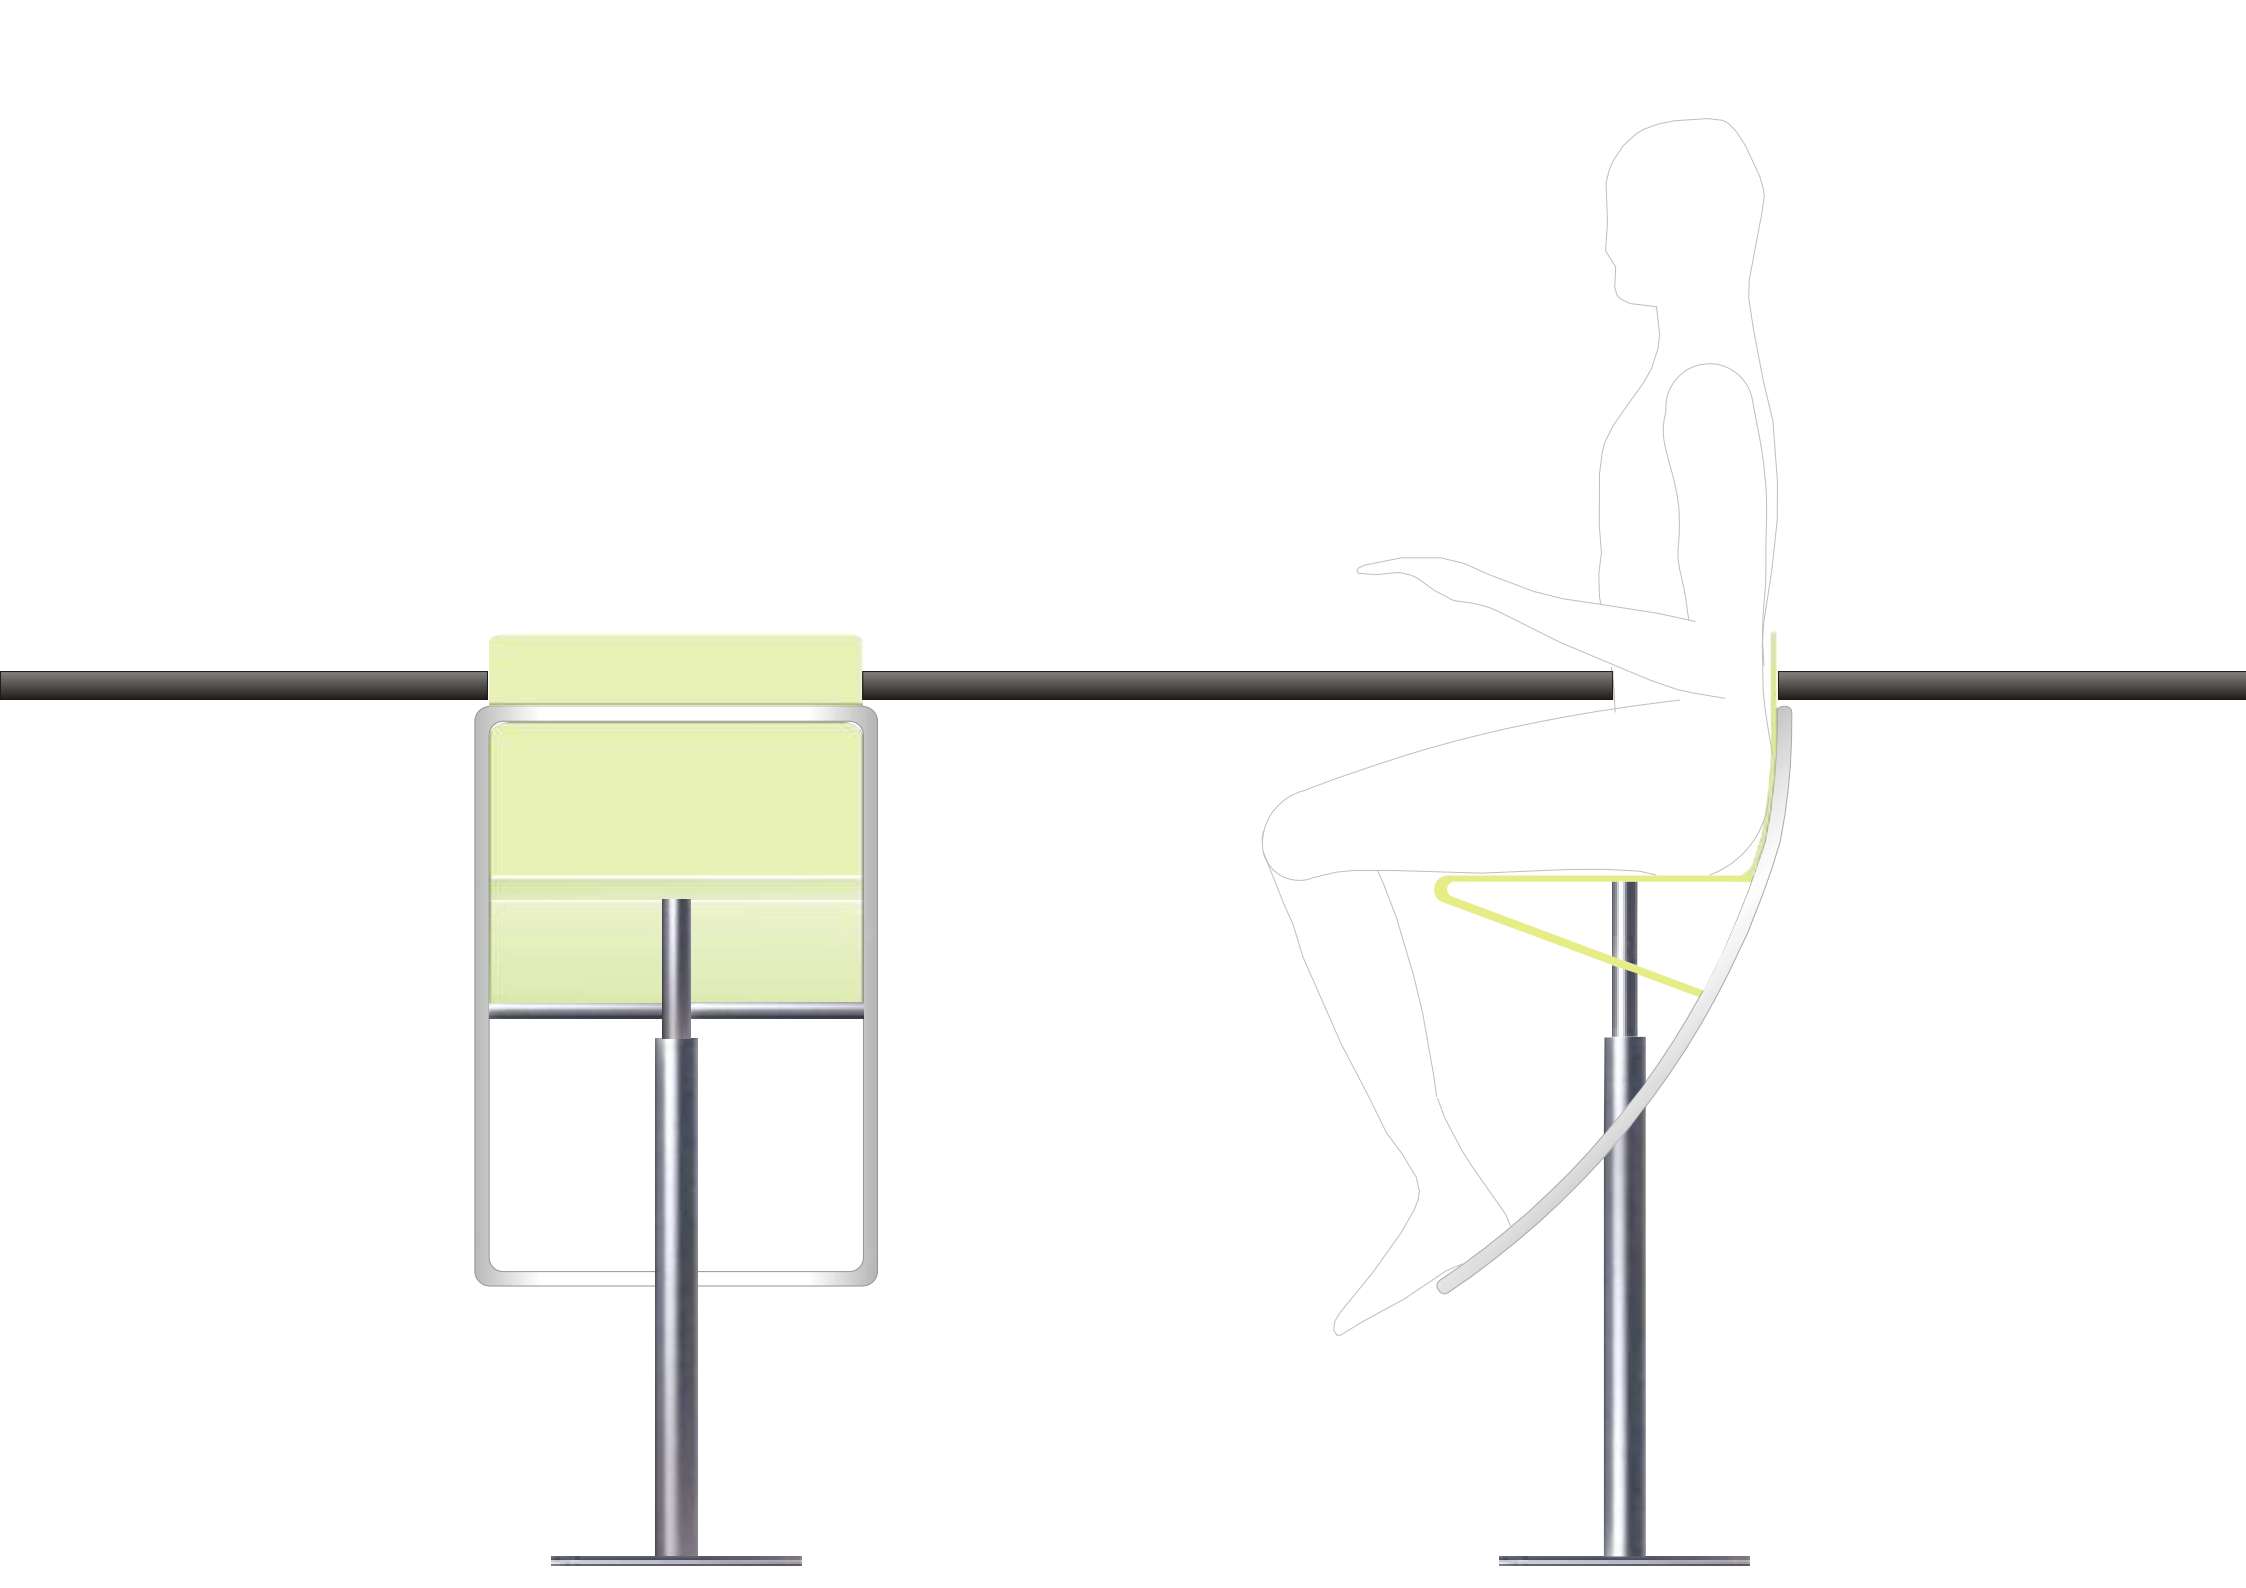

Self assembly rack
Allows various configurations

Bar Stool Design

Project at Apeejay Institute Of Design

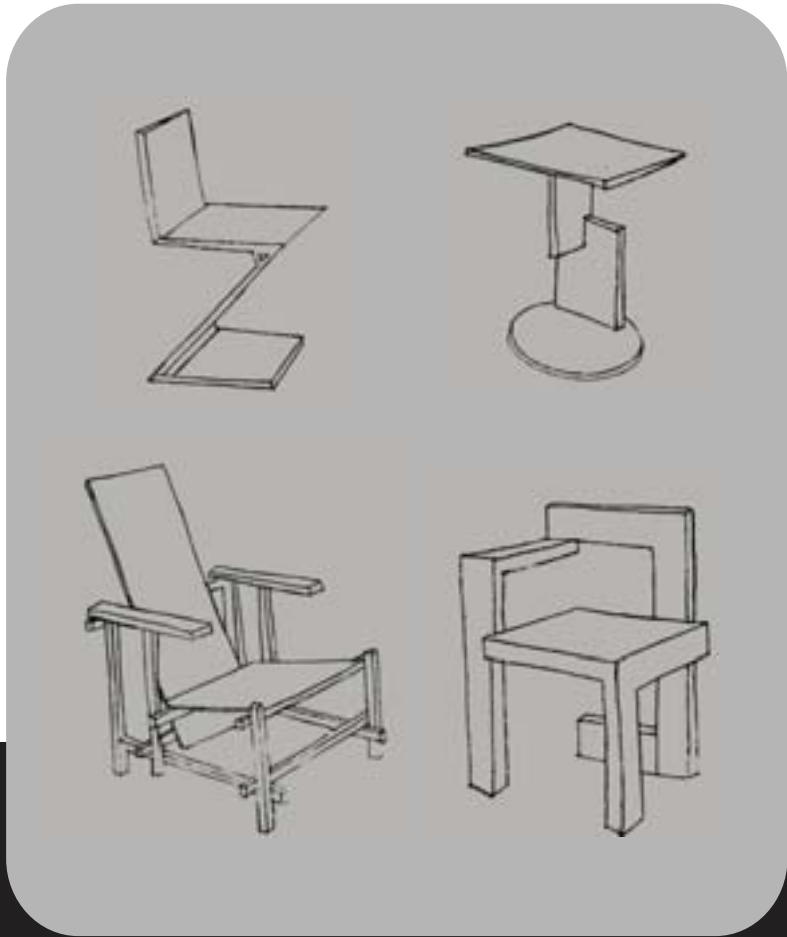

De Stijl

Project at Apeejay Institute Of Design

Inspired by Rietveld furniture of De Stijl (The style) art movement.

Alternative Surfaces

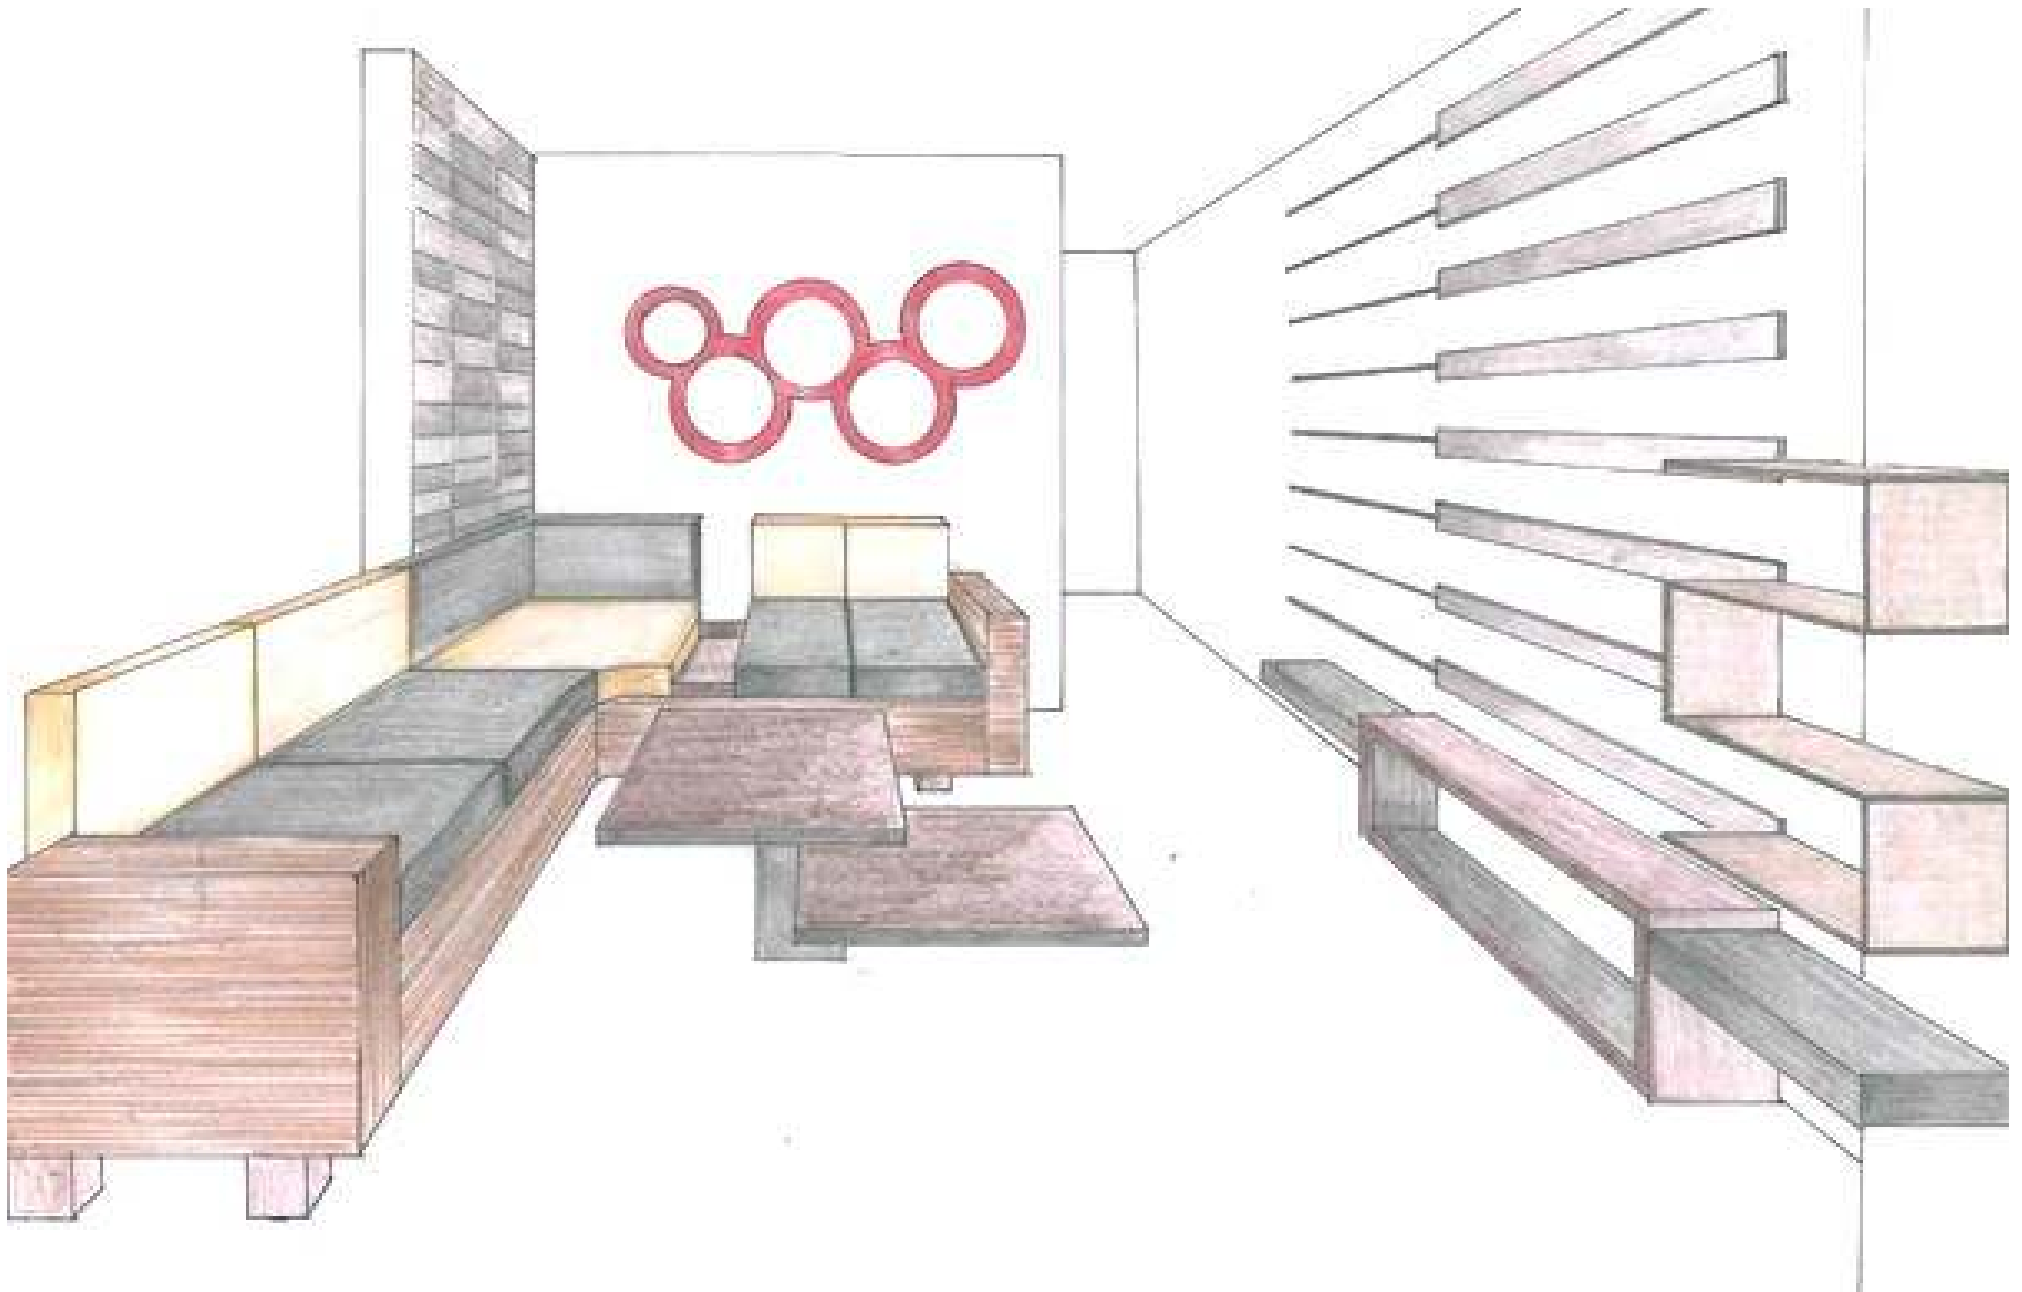

At Srishti School Of Art, Design & Techonology

Spatial Design Exercises

At Apeejay Institute Of Design

Moonflower

User interface design
At Srishti School Of Art, Design & Technology

Prototype of an interactive lamp that interacts with the surrounding levels of illumination as well as the user. Circuit bending exercises with the Arduino board.

Gateway paper & masking tape flowers

Moon Vehicle Project

Experimental Media Art

At Srishti School Of Art, Design & Technology

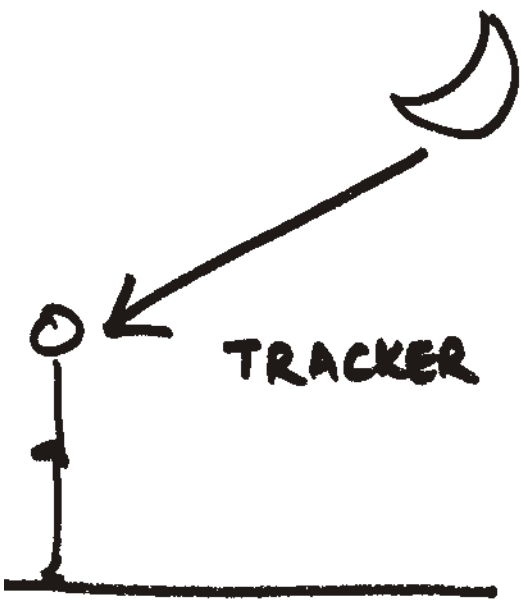

The initiative is supported by NIAS, Bangalore,
Leonardo/Olats and The Art Catalyst, London
Addressing issues of access and outreach and
establishing pathways to information in a
democratic, publicly funded concept

A public, cultural response to the launch of Chandrayaan, India's first lunar satellite. Making the science of space exploration & satellite technology more approachable and accessible; creating new cultures through events and dia;ogues.
